

# OctoTools™ for FAXCOM®

Adding Forms Design and Document Management to **FAXCOM Servers** and **FAXCOM Anywhere** Solutions from BISCOM, Inc.©

OctoTools allows you to easily create and enhance the presentation of your data and reports for print, web, and electronic output including Biscom's powerful **FAXCOM Fax Servers** and **FAXCOM Anywhere** solutions.

With the OctoTools interactive GUI, you can speed up the design of new forms, emulate/replace pre-printed forms, and enhance report output, including legacy reports from any source. OctoTools significantly enhances the appearance of your output. It is now easy to present your data to clients and customers the way you want and send it where you want.

Mapping data & images dynamically and accurately to your new form is easy with OctoTools' drag and drop functionality. Results are immediately available and viewable to aid in the design. With a smooth integrated process your faxes can then be processed automatically with no operator intervention and no changes to your existing applications!

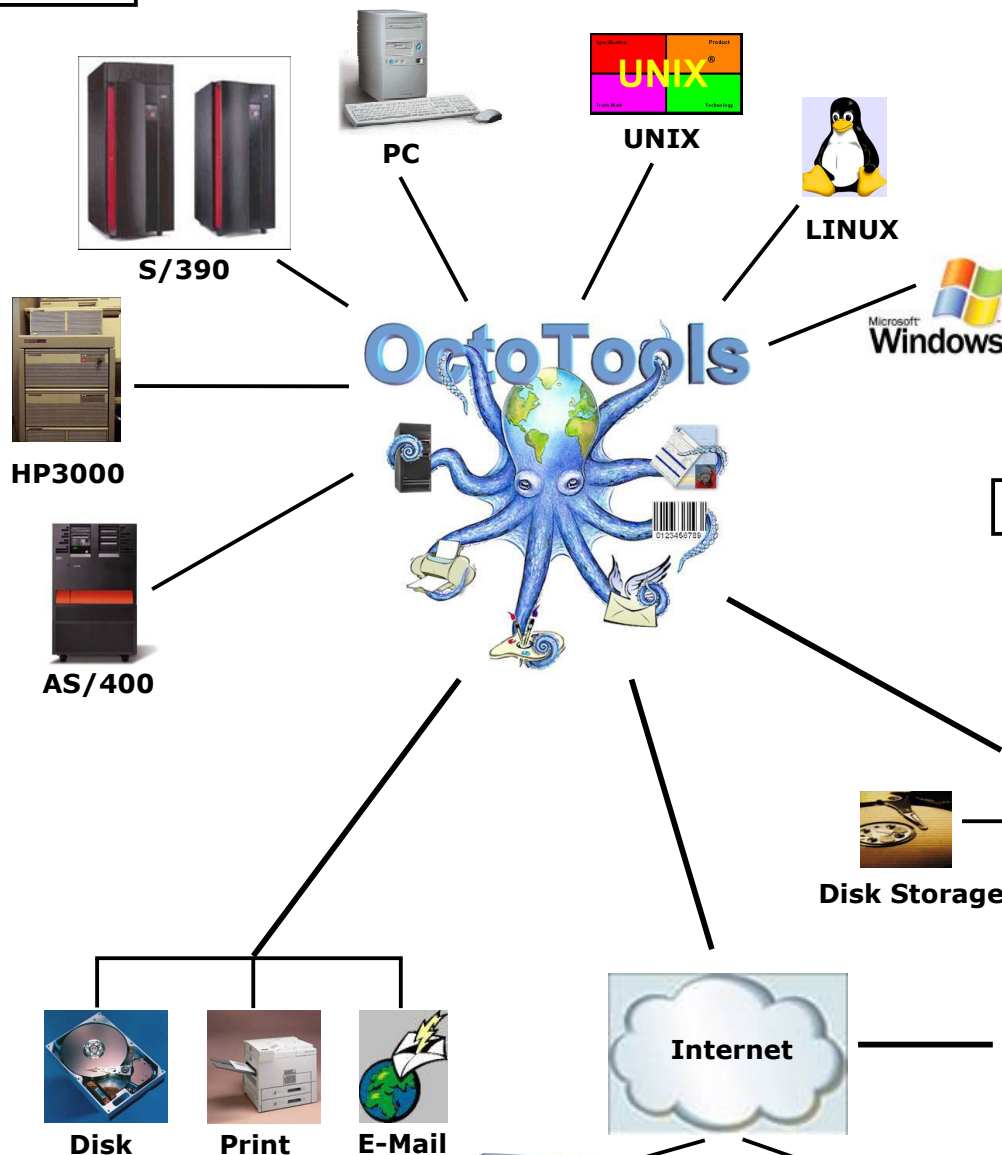

Biscom's **FAXCOM** fax server and fax software solutions help organizations improve the efficiency of inbound and outbound fax workflow. The **FAXCOM** Server software provides an enterprise fax solution supporting desktop fax, production fax, e-mail to fax, web fax and customized fax workflows.

## OctoTools for FAXCOM Benefits

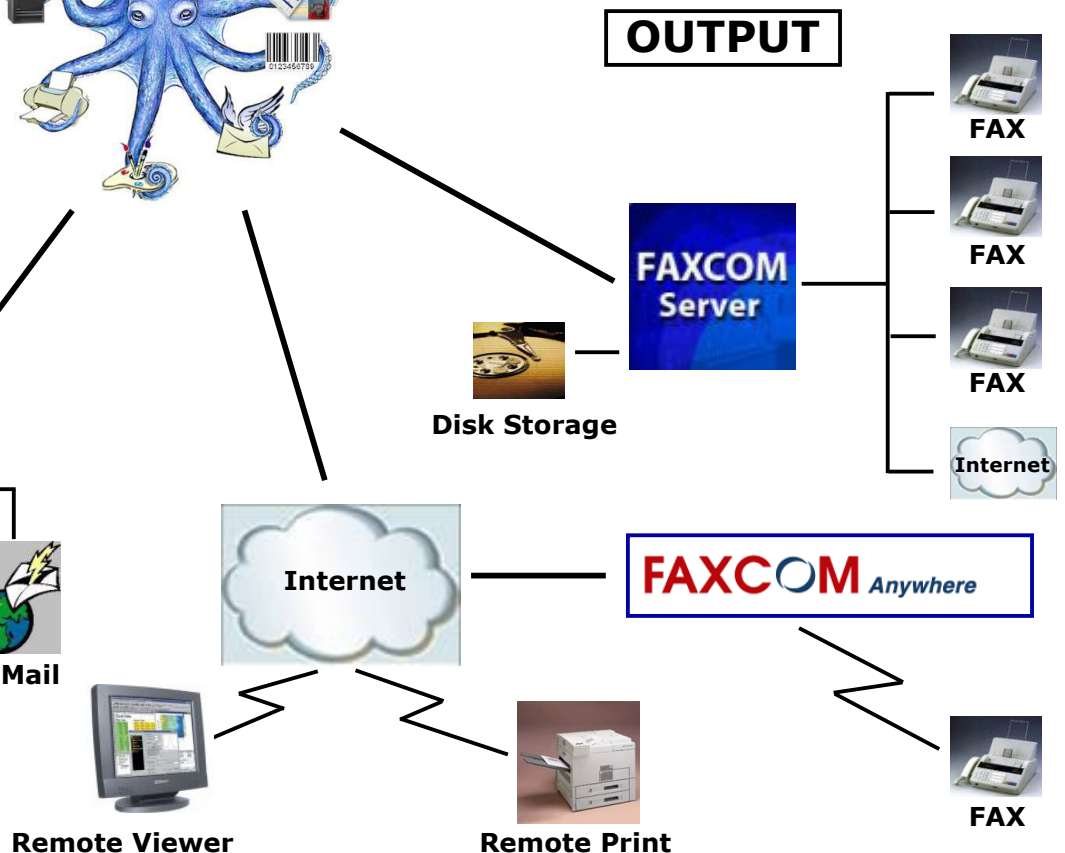

- **Smooth Integration** with FAXCOM, for automated fax generation and delivery
- Enhance the look and feel of your faxes, data, and legacy systems by adding striping, logos, graphics, and images for a more attractive and readable output **without changing a single line of code**
- Additionally post data to the web, print, and send via e-mail with **no operator involvement**
- **Lower overhead** by eliminating pre-printed forms, multi-part copies, reducing paper and print supplies, and eliminate reliance on old or obsolete printers
- **Reduce printing costs** by over 90% utilizing electronic document archiving
- Seamless universal input from any platform for **quick and easy implementation**
- PDF format **increases output security** with 128 bit encryption and the ability to assign rights to copy, print, and save
- Text searchable PDF's with indexing and keywords allow you to **quickly find the data you need**
- Output may be automatically customized based on input data, including "removing sensitive information" and adding (VDP) Variable data Print capability for **increased acceptance and impact**
